

Genesis Hang

gh104@wellesley.edu | [LinkedIn](#)

EDUCATION

Emory University, Laney Graduate School, Atlanta, GA

Expected 2031

PhD in Computer Science & Informatics

Wellesley College, Wellesley, MA

May 2026

B.A. in Computer Science, Minor in Biochemistry

- ❖ Relevant CS Coursework: Data Structures, Probabilistic Foundations of Machine Learning, Fundamental Algorithms, Theory of Computation, Machine Learning, Foundations of Computer Systems, Databases with Web Interfaces

Massachusetts Institute of Technology, Cambridge, MA

Cross-Registered Student (Spring 2024, Spring 2025)

- ❖ Relevant CS Coursework: 6.100A Introduction to Programming and Computer Science, 6.100B Introduction to Computational Thinking and Data Science, 6.101 Fundamentals of Programming

RESEARCH EXPERIENCE

Undergraduate Researcher, Wellesley College, MOGU Lab

January 2025-July 2026

Advisor: Yaniv Yacoby

- Developing new method, Sparse Variational Latent Similarity Gaussian Process, to improve forecasting of suicide-related events for patients with little longitudinal data.
- Collaborated with clinicians from MGH, Harvard's Medical School, and Harvard's Department of Psychology
- Findings: Method reveals importance of maintaining patient heterogeneity in suicide prediction efforts
- Impact: Novel method to visualize and interpret patient similarity

AI Studio Fellow, Novartis

August 2024-January 2025

Advisors: Walter Georgescu, Xiaoyan Zhang

- Implemented neural network trained on histopathology images to generate image embeddings and evaluating quality of results based on number of good matches retrieved using high-dimensional image embeddings and low-dimensional projections
- Findings: Developed CBIR algorithm to query histopathology image databases
- Impact: Aid in optimizing potential diagnostic information for pathologist examination

Undergraduate Researcher, MIT Sinha Lab

January 2024-May 2024

Advisor: Pawan Sinha

- Visualized control and test subject A/V experiment results through Matplotlib walker simulations
- Conducted analysis exploring potential correlation using polynomial interpolation, b-spline interpolation, and moving averages on psychophysical behavioral data
- Findings: Method was able to detect threshold in which visual interpretation deteriorates based on audio-visual cues
- Impact: Aid in the development of tools for measuring and improving functional vision.

Undergraduate Researcher, MIT Hacking Medicine

September 2023-February 2024

Advisor: Freddy T. Nguyen

- Quantified and visualized possible correlators to MIT-associated startup survival rates and total capital raise
- Curated a database representing MIT's plethora of startup initiatives and support, additionally providing further insight and analysis from the data
- Automated formatting and writing of data
- Findings: MIT-associated startups experience increased survival rates due to plethora of entrepreneurship-related initiatives, increased R&D funding, and increased patent filings.
- Impact: Provide support for potential startups based on data informed decisions that will positively impact patient healthcare innovation

PUBLICATIONS

- ❖ **Genesis Hang**, Hope Neveux, Matthew K. Nock, Yaniv Yacoby. *Improving Forecasts of Suicide Attempts for Patients with Little Data*. Accepted @ the **NeurIPS Learning Time Series for Health 2025 Workshop**

PRESENTATIONS

- ❖ **Genesis Hang** (August 2025) "Improving Forecasts of Suicide Attempts for Patients with Little Data"

- Poster presented @ Wellesley College Science Center 2025 Summer Research Program Poster Session
- ❖ **Genesis Hang** (September 2025) "Improving Forecasts of Suicide Attempts for Patients with Little Data"
- Poster presented @ UMBC 2025 McNair & Undergraduate Research National Conference
- ❖ **Genesis Hang, Annie Chen** (October 2025) "Improving Forecasts of Suicide Attempts for Patients with Little Data"
- Guest speaker @ Tufts Mike Hughes - Machine Learning Research Lab
- ❖ **Genesis Hang, Annie Chen** (December 2025) "Improving Forecasts of Suicide Attempts for Patients with Little Data"
- Guest speaker @ CS 345 Probabilistic Foundations of ML
- ❖ **Genesis Hang** (December 2025) "Improving Forecasts of Suicide Attempts for Patients with Little Data"
- Poster presented @ NeurIPS Learning Time Series for Health 2025 Workshop

FELLOWSHIPS, AWARDS, CERTIFICATES

- | | |
|--|-------------------------------|
| Ronald E. McNair Scholars Program , Wellesley College | <i>May 2025-Present</i> |
| Buck Foundation Upperclassmen Scholarship , Buck Foundation | <i>March 2025</i> |
| Break Through Tech AI , Massachusetts Institute of Technology | <i>May 2024-December 2024</i> |
| ➤ <i>Fellow</i> : Selected from 3,000+ applicants and engaged in Machine Learning coursework with Cornell faculty, experiential learning experiences, and mentorship from industry professionals | |
| The Rebecca Summerhays Award for Growth in Writing , Wellesley College | <i>May 2023</i> |
| Machine Learning Foundations , eCornell | <i>May 2023</i> |
| ❖ Certificate received after completing introductory machine learning course offered through Break Through Tech AI | |

TEACHING AND WORK EXPERIENCE

- | | |
|--|-------------------------------------|
| Teaching Assistant , Wellesley College (Hours per week: 2-6) | <i>September 2025-December 2025</i> |
| ➤ Assisting in CS 345: Probabilistic Foundations of Machine Learning, providing support to students in understanding probabilistic ML models, deep Bayesian regression/classification, and generative models | |
| ➤ Hosted weekly office hours and graded coursework involving communication of probabilistic ML models | |
| Barista , Starbucks Wellesley, MA (Hours per week: 12-20) | <i>January 2023-November 2025</i> |
| ➤ Delivering efficient customer service in a high-paced environment, preparing beverages, handling transactions, and maintaining a welcoming atmosphere for guests. | |
| ➤ Used earned money to support myself and my family | |
| Office of Student Involvement Assistant , Wellesley College (Hours per week: 6-8) | <i>September 2022-Present</i> |
| ➤ Communicate and coordinate with student groups (personally and with 25live) to organize weekly events that promote inclusivity and diversity on campus. | |
| ➤ Used earned money to support myself and my family | |
| Creative Services/Promotions Intern , KHOG/KHBS 40/29 - HEARST (Hours per week: 40) | <i>June 2023-August 2023</i> |
| ➤ Assist with promotion and promotion production for local news station with utilization of Nielsen ratings and given weekly research reports to maximize viewership by community members. | |

CLUBS & ORGANIZATIONS

- | | |
|--|-------------------------------|
| Wellesley Asian Dance Organization | <i>February 2023-Present</i> |
| ➤ <i>President</i> : Lead and oversee all club activities, managing executive board members and ensuring smooth operations. Develop strategic plans for club growth, foster a welcoming community, and coordinate performances and events. | |
| ➤ <i>Co-Social Chair</i> : Collaborate with club members and outside colleges to plan and hold club community events. | |
| ➤ <i>Co-Publicity Chair</i> : Create and produce media content showcasing club activities to encourage maximum community engagement. | |
| Wellesley Google Developer Student Club | <i>September 2023-Present</i> |
| ➤ <i>Co-Events Manager</i> : Collaborate with club members and outside colleges to plan and hold club community events that promote innovation and inclusivity within the computer science community. More numbers + Action | |

SKILLS

Programming: Python, Java, C, JavaScript, HTML/CSS

ML/Data: JAX, NumPyro, GPJax, Optax, Chex, Pandas, NumPy, Scikit-learn

Methods: Machine Learning, Probabilistic Modeling, Gaussian Processes, Bayesian Inference, Data Visualization
